MMEM group has a national network of over 300 service centres which are conveniently located near our key markets.

Summary

MM Electrical Merchandising (MMEM), AWM Electrical, D&W Electrical, Haymans Electrical & TLE Electrical are well respected trading names of Metal Manufactures Limited and are commonly referred to as the MMEM group. We are the leading distributor of electrical and data components and equipment in Australia.

In operation since 1916, we are one of Australia's largest electrical and data wholesalers. MMEM employs over 1500 experienced staff, and has over 125,000 products on permanent catalogue. We offer flexible and customised MRO supply solutions covering all aspects of the supply chain as well as sourcing of unique OEM products to suit even the most unusual situation.

Description

MMEM group has a national network of over 300 service centres which are conveniently located near our key markets. We offer flexible and customised MRO supply solutions covering all aspects of the supply chain as well as sourcing of unique OEM products to suit even the most unusual situation.

Our comprehensive on-line catalogue provides access to your very own secure cost pricing to build quotes, bill of materials or even place orders. MMEM currently exchange e-documents from Purchase Orders to Invoices, including capabilities such as Change Orders, Order Acknowledgement, Advance Shipping Notices, Credit Notes and Consolidated Invoices Files. Available "transfer protocols include XML, EDI, IDOC's, HTTP/s, Flat File, Email, Fax and Punchout solutions.

MMEM offers our account customers convenience, time and cost saving opportunities by allowing access to statements and invoices on-line. One of the biggest challenges faced by businesses in the electrical industry is

keeping track of their purchases. For this reason, MMEM introduced the Authorised Buyers Card which provides security and allows businesses to identify the purchaser, the allocated job for the materials and other traceable information. Goods can only be charged via scanning of the bar-coded card or password identification. MMEM can also provide individual usage reports (weekly, fortnightly or monthly) which can then be used to further consolidate spend and improve company savings.

To assist customers that run inventories or warehouses, MMEM can print customised labels complete with barcodes that can be attached to outgoing goods. The labels can be tailored to suit each customers requirements, but generally will have the customer material/ stock number, MM part number, short form description, quantity and the stock barcode. All of these features significantly reduce receipting times and helps all personnel identify product quickly and easily.

Industries Served

- > Automotive
- > Clean Energy
- > Construction & Engineering
- > Defence
- > Health
- > IT & Communications
- > Manufacturing
- > Mining
- > Oil, Gas & Energy
