Sem.Darwin believe in a greener world for today and are working towards a greener tomorrow. We do this by providing quality renewable energy solutions to our clients which in turn better our community and contribute to a greener future for all. We are continuously thinking of new ways to combat societies negative effects on the planet and introduce innovative technology to our clients to help bring our collective vision to Australia and thus the world.

Currently we offer quality renewable energy solutions by means of PV solar arrays for residential and commercial properties, hybrid solar battery systems, ground mounted arrays, solar air-conditioning and energy efficient products and Energy efficiency audits for homes and businesses. Not only is this contributing to a greener planet but our clients are saving on their energy bills.

---

## Summary

Established in 2015, SEM Darwin is an electrical contractor with over 30 years combined experience in the domestic and commercial sectors. Delivering high quality solar

products, solar design & installations, electrical & mechanical air-conditioning installations and maintenance to the Territory.

---

## Description

SEM Darwin have grown from a small local electrical contractor in the Territory to now employing over 30 local qualified electricians, cec installers and professionals. With another office located in Brisbane servicing the QLD & NSW regions.

Our staff have extensive experience installing commercial & domestic solar systems, with an average installation rate of 40kw per day in domestic projects alone.

SEM provide tailor made products to best suit the needs of their client and supply and install leading solar panel products including LG and REC solar Panels, solar air-conditioning systems, solar pool & bore pump systems, and Solar Edge & Fronius inverters.

SEM Darwin specialise in Commercial Electrical Contracting. Installations, preventative & reactive maintenance for

government and commercial projects as well as commercial property maintenance and remote area projects. We offer specialised electrical services including thermal imaging & emergency lighting testing.

SEM Darwin provide aircon installation, repairs and servicing and only supply the very best quality products. Including the latest Solar air-conditioning units and new energy efficient inverter systems.
