Sikla is a one stop shop for secondary steel and industrial pipe supports. We supply all engineered hangers and supports against specification.

Our USP is an innovative modularisation approach which significantly improves the installation workflow.

Summary

Being in a position to install with the Sikla modular pipe support system, the relevant subcontractor is in a better position to achieve being off site both, on time and within budget.

Sikla supports the detailed piping design process by implementing required software plugins (e.g. for PDMS or SP3D) and/or by deploying a resident engineer wherever the detailing of pipe supports takes place.

Description

Sikla pipe support products offer these four key benefits:

- . All parts are reusable without wastage
- . Strong but lightweight
- . Readily available from stock; quick lead times
- . There is no need for hot works!

The following benefits form the foundation of siFRAMO:

- easily adjustable connections and minimal assembly - thread forming, shake proof fastening.
- fully compatible with all engineered pipe supports

Industries Served

- > Construction & Engineering
- > Defence
- > Manufacturing
- > Mining
- > Oil, Gas & Energy
- > Steel
- > Water

Major Clients

- > BASF
- > Bayer
- > Evonik
- > GE
- > Hitachi Zosen
- > Linde
- > Merck
- > Nestle
- > Novartis
- > Roche
- > Sabic
- > Siemens
- > Solvay
- > Valmet
- > Wacker

Products & Services

- > Pipe Supports
- > Pipe Hangers
- > Pipe Stands
- > Pipe Shoes
- > Engineered Hangers & Supports
- > Modular Secondary Steel Supports
- > CAD Implementation
- > Pre-manufacturing
- > On-Site Assistance
- > Product Training

Facilities and Equipment

- > Warehouse Facility
- > Pre-fabrication
- > Structural- and CAD design

Previous Significant Projects

2018

ME6 Singapore

\$4,000,000

Client: Evonik Industries

A world-scale plant for the production of the amino acid DL-methionine. Sikla supplied 336 tons of engineered pipe supports and modular secondary support frames, comprising approximately 9,000 isometric pipe support positions, shipped pre-fabricated in 35 containers.
