Technical Australia has evolved through a combination of industry leading solutions providers and experienced personnel with a common goal of providing our partners with world class support in achieving their operational, efficiency and environmental KPI's.

## Summary

Specialist Service Provider for the Oil, Gas and Energy Sectors providing Technical Solutions through package design/supply, component & materials development &

maintenance to drive optimisation and reliability improvements of our clients compression assets.

## Description

Technical Australia has evolved through a combination of industry leading solutions providers and experienced personnel with a common goal of providing our partners with world class support in achieving their operational, efficiency and environmental KPI's.

The Technical Group was formed to achieve fulfillment in the professional careers of each and every member of our organization, encouraging personal growth and enabling them to pursue happiness supported by a simple and practical management system.

Our company's mission is to provide the latest Engineered Solutions for Gas Compression, Process Refrigeration, System Integration and other related Applications and Maintenance Programs whilst assuring complete satisfaction of our Customers and Partners.

Commitment, accountability and high ethical standards are the foundation of our company's operating structure where both safety and quality are never compromised.

Our Engineered Solutions provide the complete spectrum of services, starting from conceptualization, engineering feasibility to construction and field commissioning. This enables us to supply complete turnkey or customized projects within many industry sectors, combining Package Design and Fabrication, commissioning and long term after sales support. This ensures long term integrity of the equipment through component supply/inventory management and reconditioning programs. As part of the Technical Group of Companies, our supporting manufacturing locations are situated in Singapore, Indonesia, Korea, Thailand, USA and Columbia. This encompasses full in-house engineering capabilities to enable us to support a full range of our customer's requirements. Whether a new design concept or upgrading existing equipment to ensure optimization in operations and efficiency is maintained through changing process conditions.

## Associations

- > GE Channel Partner

---

## Products & Services

- > Complete Compression Packages
- > Component supply & refurbishment
- > Troubleshooting & technical support
- > Maintenance & servicing programs
- > OEM Channel Partner

---

## Accreditations

- > ISO 9001:2015
- > ISN Network

## Industries Served

- > Clean Energy
- > Oil, Gas & Energy

---

## Major Clients

- > Quadrant Energy
- > Santos Energy
- > Woodside Energy
- > Westside Corporation
- > Armour Energy
- > Todd Energy
- > APA Energy

## Facilities and Equipment

- > Workshop
- > Warehouse
- > Fabrication
- > Parts manufacturing
- > Centre Lathes
- > CNC Lathes
- > Milling machines
- > Lapping Machines
- > Table Saw
- > Mig Welder
- > Tig Welder
- > Assorted hand tools
- > Torquing equipment
- > Shot blast Cabinets
- > Wet Blast Cabinets
- > Ultrasonic cleaners

## Previous Significant Projects

**2019**

**NGV FPSO  
\$1,000,000**

**Client: Santos WA Energy**

Long term Healthcare Contract, supporting the operation, maintenance and materials management of 3 x WG76 GE compressors.

Many reliability improvements and performance upgrades have also been implemented during the current life cycle of the compressors.

**2019**

**Worthington Compressor Rebuild  
\$125,000**

**Client: Denison Gas**

Full Rebuild and Repair of a 4 throw Worthington Compressor that failed on start-up following an overhaul from another supplier.

TA oversaw the removal, transportation, rebuild at our Brisbane facility, installation and commissioning.

Successful start-up, with less vibration and improved performance than achieved historically.
