Action Arbor are leaders when you are contracting for any land clearing or revegetation programs required for civil development.

We are fully equipped to meet your project specifications. Over the past two decades, we have worked with both local and state government bodies, insurance and civil works enterprises in tree management and land clearing projects across Australia.

Our work on tree makesafes in emergencies is one of many examples. We were awarded an AA+ rating for our track record of excellent and consistent work ethos in the areas of quality and safety. As a result, we have earned a preferred tree contractor within the insurance industry. Leading civil works entities, both private and government, have entrusted Action Arbor with its reputable work ethos, distinguished arboriculturist skills, honesty and integrity to carry out tree maintenance programs.

We have a renowned reputation as a premier land clearing company, specialising in site preparation.

Summary

Serving the tree industry since 2005, we are now approaching our 15th year in business.

Action Arbor was formed in 2013, as a result of the catastrophic bush fires that devastated the NSW Blue Mountain Region.

From humble beginnings, owner/operator Mohammad Abbas started with little more than one truck, a few chainsaws and a burning ambition to provide excellent service and build a successful business.

The company has since grown to encompass an extensive

list of fleets, including multiple trucks and chippers, excavators, EWP's, a crane and 700hp Horizontal Tub Grinder. Our team includes highly experienced and qualified crews along with a support office who are constantly refining our business model to suit the ever-changing and demanding nature of the industry.

Through the years, we have been heavily involved with a wide array of clients ranging from residential homeowners, corporate, commercial and government bodies, as well as the NSW State Emergency Services and RMS.

Description

ACTION ARBOR is all about providing excellent service whilst carrying out emergency tree makesafes expeditiously, with essential skills focused on 100% care factor and safety.

From the get-go working in residential and commercial sectors of the tree industry, we gained experience in day to day intelligence with our dedication to the trade giving customers excellent service. The ever-changing demands of the industry offered the opportunity to further educate our team from directorship to groundsman pursuing higher qualifications in compliance with industry and government regulations. This wheel of conformity continually evolving furthering our knowledge and experience.

Since our early beginnings in 2005, we have cultivated greatly in maturity. Throughout the years we have completed numerous courses acquiring further eligibility toward large scale projects, such as storm and bushfire events.

OUT OF CATASTROPHE COMES OPPORTUNITY

Formed in 2013, Action Arbor was the result of the catastrophic bush fires that devastated the NSW Blue Mountain Region. The state government announced a Disaster Recovery Funding Arrangement (DRFA) to ensure security by making safe dangerous trees not covered by individual insurance policies.

NRMA Insurance governed the operation which was project managed by Johns Lyng Group NSW. Action Arbor was hand-picked to manage the tree component. Our proven track record on-time attendance, communication, compliance, quality of documents, skills & qualifications and fully equipped with machinery placed us in a dependable position, where we consistently scored AA+, the highest rating possible. We were part of history, taking part in a massive makesafe and clean-up operation. We worked alongside other contractors proudly providing assistance and safety to the community.

Our role as part of an elite team, our Director of Operations Mohammed Abbas was called upon to meet with officials, to assess, monitor and mark trees which were dangerous and needed to be made safe. Here Action Arbor proved

itself most dependable carrying out a substantial measure of the work, making safe fire-damaged trees.

This operation was closely managed and regulated by Nadine Ward who worked for the then administrator in the capacity of Company Quality Assurance Officer. Down the track, Action Arbor secured her employment, bringing to the table a wealth of experience in catastrophic event management.

The 2019-20 'Black Summer' bushfire disaster, has again brought to the forefront our company's combined experience and skills to effectively execute insurance company generated makesafe work orders.

MAKING IT SAFE NATIONWIDE

Action Arbor are highly experienced AQF Level 5 Arborist emergency specialist, in tree makesafe and management. Productively employed by Insurance Builders and selected State Emergency Service depots. Professional trade operators with whom we share a close and long-standing alliance with, are subcontracted to carry out makesafes interstate.

ACTION SPEAKS LOUDER THAN WORDS

Leading civil works entities, both private and government, have entrusted Action Arbor with its reputable work ethos, distinguished arboriculturist skills, honesty and integrity to carry out tree maintenance programs.

We are fully equipped to meet project specifications. Being conscious of our impact on the environment, the quality of our workmanship and the safety of our teams and after many policies and procedures in place (which are regularly reviewed) we are proudly ISO accredited.

In summary, our work ethos runs deeper than making trees safe. Attending properties ravaged by fire and storms, and any of life's circumstances leaves communities emotionally overwhelmed and sensitive. Having compassion and empathy is critical for human dynamics particularly when dealing with the elderly and ill. This only comes from a place of 100% care and consideration.
