Our role is to find the suppliers and service providers who are best equipped to meet the requirements of hundreds of projects across Australia and New Zealand.

Summary

Industry Capability Network (ICN) is a business network that introduces Australian and New Zealand companies to projects large and small.

In essence, we offer a new business source for suppliers and a sophisticated search service for project managers. ICN could well be described as the innovative industry matchmaker.

Our role is to find the suppliers and service providers who are best equipped to meet the requirements of hundreds of projects across Australia and New Zealand.

Every day we work with local suppliers and project managers to help save valuable time and money in the procurement process. We also help to secure billions of dollars in contracts and jobs that may otherwise have gone overseas.

If you're a major project developer, we can put you in contact with the best suppliers. If you're a supplier, we can connect you with the best projects planned or already underway across Australia and New Zealand - and around the world.

Description

Our role is to find the suppliers and service providers who are best equipped to meet the requirements of hundreds of projects across Australia and New Zealand.

The Northern Territory Industrial Supplies Office was founded in 1988 in response to an approach from the Australian Army.

The government discussed the situation with the Chamber of Commerce NT and the Master Builders Association NT

and the new organisation, without membership restrictions, was formed. focus here was, and remains, the promotion of all goods and services in the Territory.

Through its national alliance, ICN is able to satisfy the requirements of its clients by accessing the national database, known as ICN Toolbox, to locate goods and services not available in the Territory. It has also adopted the network's web based project management tool, ICN Gateway.
